

LEARNING IS FUN

BY- ARTI SHARMA

'I hear I forget, I see I remember , I do I understand ' these wise words are said by Confucius. The concept that Confucius lays out is that students learn best by taking an active role in their learning .Merely feeding information in their mind is usually forgotten.

A Fun , the style of learning is a great way to introduce new subjects and new materials to the students . It draws students towards the essential skills and helps them to understand the new concept .This type of atmosphere is a great way to reel in students , even the apprehensive or uninterested one.

Teachers use various activities that make learning engaging and captivating to ensure students' participation .Having fun while learning helps students to retain information better because the process is enjoyable .

Kendriya Vidyalaya Bailey Road is pacing forward to make learning easy and memorable

Use of Technology- Technology is a great way to make learning fun. Research has shown that using technology in the classroom can increase learning.

Activity based learning-Doing small experiments in the class help the students to learn easily and make their concept clear.

Learning by doing- Students working together as co-operative learning strategies in the classroom help them to retain information thicker and longer .They develop critical thinking skill and communication skill,

Arranging small trips- Arranging small trips is a great way for students to connect what they are learning in lesson'

Interaction between teacher and students- Interaction between teacher and students make the class lively. Students learn more by taking active part in teaching. Their attention remain focused.

In short, we can say children always want to enjoy not learn. They can't study for hours . But we know there is a lot of competition ahead in life. These activities help the students to relieve the pressure on their mind and vivify their thoughts. Hence one is competent to learn.
